April 2008 – No. 74

Euscorpius

Occasional Publications in Scorpiology

EDITOR: Victor Fet, Marshall University, ‘fet@marshall.edu’

ASSOCIATE EDITOR: Michael E. Soleglad, ‘soleglad@la.znet.com’

Euscorpius is the first research publication completely devoted to scorpions (Arachnida: Scorpiones). *Euscorpius* takes advantage of the rapidly evolving medium of quick online publication, at the same time maintaining high research standards for the burgeoning field of scorpion science (scorpiology). *Euscorpius* is an expedient and viable medium for the publication of serious papers in scorpiology, including (but not limited to): systematics, evolution, ecology, biogeography, and general biology of scorpions. Review papers, descriptions of new taxa, faunistic surveys, lists of museum collections, and book reviews are welcome.

Derivatio Nominis

The name *Euscorpius* Thorell, 1876 refers to the most common genus of scorpions in the Mediterranean region and southern Europe (family Euscorpiidae).

Euscorpius is located on Website ‘<http://www.science.marshall.edu/fet/euscorpius/>’ at Marshall University, Huntington, WV 25755-2510, USA.

The International Code of Zoological Nomenclature (ICZN, 4th Edition, 1999) does not accept online texts as published work (Article 9.8); however, it accepts CD-ROM publications (Article 8). *Euscorpius* is produced in two *identical* versions: online (ISSN 1536-9307) and CD-ROM (ISSN 1536-9293). Only copies distributed on a CD-ROM from *Euscorpius* are considered published work in compliance with the ICZN, i.e. for the purposes of new names and new nomenclatural acts. All *Euscorpius* publications are distributed on a CD-ROM medium to the following museums/libraries:

- **ZR**, Zoological Record, York, UK
- **LC**, Library of Congress, Washington, DC, USA
- **USNM**, United States National Museum of Natural History (Smithsonian Institution), Washington, DC, USA
- **AMNH**, American Museum of Natural History, New York, USA
- **CAS**, California Academy of Sciences, San Francisco, USA
- **FMNH**, Field Museum of Natural History, Chicago, USA
- **MCZ**, Museum of Comparative Zoology, Cambridge, Massachusetts, USA
- **MNHN**, Museum National d'Histoire Naturelle, Paris, France
- **NMW**, Naturhistorisches Museum Wien, Vienna, Austria
- **BMNH**, British Museum of Natural History, London, England, UK
- **MZUC**, Museo Zoologico “La Specola” dell’Universita de Firenze, Florence, Italy
- **ZISP**, Zoological Institute, Russian Academy of Sciences, St. Petersburg, Russia
- **WAM**, Western Australian Museum, Perth, Australia
- **NTNU**, Norwegian University of Science and Technology, Trondheim, Norway

Scorpions of Iran (Arachnida, Scorpiones). Part IV. Kohgilouyeh & Boyer Ahmad Province

Shahrokh Navidpour ¹, František Kovařík ², Michael E. Soleglad ³ & Victor Fet ⁴

¹ Razi Reference Laboratory of Scorpion Research (RRLS), Razi Vaccine and Serum Research Institute, Sepah st., Hejrat sq., Ahvaz, Khoozestan, Iran

² P.O. Box 27, CZ-145 01 Praha 45, Czech Republic

³ P.O. Box 250, Borrego Springs, CA 92004, USA

⁴ Department of Biological Sciences, Marshall University, Huntington, WV 25755, USA

Summary

According to previous surveys, only *Mesobuthus eupeus phillipsii* (Pocock, 1889), *Orthochirus zagrosensis* Kovařík, 2004, and *Hemiscorpius lepturus* Peters, 1861 have been recorded from Kohgilouyeh & Boyer Ahmad Province. Collections made by a team under Shahrokh Navidpour (Razi Reference Laboratory of Scorpion Research, Razi Vaccine and Serum Research Institute, Ahvaz, Khoozestan, Iran) reveal eight other species belonging to two families recorded from the province for the first time: *Androctonus crassicauda* (Olivier, 1807); *Compsobuthus matthiesseni* (Birula, 1905); *Hottentotta saulcyi* (Simon, 1880); *Hottentotta zagrosensis* Kovařík, 1997; *Odontobuthus bidentatus* Lourenço et Pézier, 2002; *Orthochirus iranus* Kovařík, 2004; *Razianus zarudnyi* (Birula, 1903); and *Scorpio maurus townsendi* (Pocock, 1900). Also presented is a key to all species of scorpions found in the province.

Introduction

Many papers deal with the scorpions of Iran to some extent, but a comprehensive study of the scorpion fauna has been lacking. We have therefore decided to survey the scorpions of Iran thoroughly, province by province. The fieldwork is conducted by the RRLS team lead by Shahrokh Navidpour and includes revisit of previously known sites, some of them type localities, and sampling of all the encountered scorpion species. All specimens are collected by UV light at night.

The Kohgilouyeh & Boyer Ahmad Province is the fourth region surveyed by the RRLS team. This province has received little attention in the past, with the first records of scorpions from there having been published by Kovařík as recently as in 1997. Kovařík (1997: 46–48) reported *Mesobuthus eupeus phillipsii* (Pocock, 1889), *Hemiscorpius lepturus* Peters, 1861, and *Orthochirus* sp. n.; which was subsequently (Kovařík, 2004: 22) described as *Orthochirus zagrosensis* Kovařík, 2004. The female allotype of *O. zagrosensis* thus is the only scorpion type known from the Kohgilouyeh & Boyer Ahmad Province. Collections made by a team under Shahrokh Navidpour (Razi Reference Laboratory of Scorpion Research, Razi Vaccine and Serum Research Institute, Ahvaz, Khoozestan, Iran) reveal eight other species of two families recorded from the province for the first time.

Abbreviations. The institutional abbreviations listed below and used throughout are mostly after Arnett et al. (1993).

BMNH – The Natural History Museum, London, United Kingdom;

FKCP – František Kovařík Collection, Praha, Czech Republic;

MHNG – Museum d’Histoire naturelle, Geneva, Switzerland;

MNHN – Muséum National d’Histoire Naturelle, Paris, France;

RRLS – Razi Reference Laboratory of Scorpion Research, Razi Vaccine and Serum Research Institute, Sepah st., Hejrat sq., Ahvaz, Khoozestan, Iran;

List of Scorpions of Kohgilouyeh & Boyer Ahmad Province

Family **Buthidae** C. L. Koch, 1837

Androctonus crassicauda (Olivier, 1807) (first report)

Figure 1: Map of southwestern Asia highlighting Iran (top) and closeup of Iran showing provinces, the Kohgilouyeh & Boyer Ahmad Province depicted in black (bottom).

Compsobuthus matthiesseni (Birula, 1905) (first report)
Hottentotta saulcyi (Simon, 1880) (first report)
Hottentotta zagrosensis Kovařík, 1997 (first report)
Mesobuthus eupeus phillipsii (Pocock, 1889)
Odontobuthus bidentatus Lourenço et Pézier, 2002 (first report)
Orthochirus iranus Kovařík, 2004 (first report)
Orthochirus zagrosensis Kovařík, 2004
Razianus zarudnyi (Birula, 1903) (first report)

Family Scorpionidae Latreille, 1802

Scorpio maurus townsendi (Pocock, 1900) (first report)

Family Hemiscorpiidae Pocock, 1893

Hemiscorpius lepturus Peters, 1861

Systematics

Family Buthidae C. L. Koch, 1837

Androctonus crassicauda (Olivier, 1807)
 Figures 4, 9, 15–18

Scorpio crassicauda Olivier, 1807: 97.

Buthus crassicauda: Simon, 1872: 247 (in part); Simon, 1879: 99; Simon, 1892: 83; Kraepelin, 1899: 16; Pocock, 1902: 373; Kraepelin, 1913: 124; Lampe, 1918: 190.

Androctonus crassicauda: Kraepelin, 1891: 175 (in part); Vachon, 1951: 343; Khalaf, 1962: 1; Khalaf, 1963: 60; Habibi, 1971: 42; Farzanpay & Pretzmann, 1974: 215; Pérez Minoccia, 1974: 17; Vachon, 1974: 909; Vachon, 1979: 31; Farzanpay, 1987: 141; Farzanpay, 1988: 36; Fet, 1989: 78; Sissom, 1994: 36; Al-Safadi, 1992: 96; Amr & El-Oran, 1994: 187; Dupré et al., 1998: 59; Kovařík, 1998: 104; Crucitti, 1999: 83; Kabakibi et al., 1999: 80; Fet & Lowe, 2000: 72; Stathi & Mylonas, 2001: 288; Kovařík, 2002: 5; Crucitti & Vignoli, 2002: 439; Vignoli et al., 2003: 2; Fet & Kovařík, g: 180; Kovařík & Whitman, 2005: 105; Lourenço, 2005: 149; Hendrixson, 2006: 38; Akbari, 2007: 76; Navidpour et al., 2008a: 5; Navidpour et al., 2008b: 3; Navidpour et al., 2008c: 3.

Prionurus crassicauda: Pocock, 1895: 292; Tullgren, 1909: 2; Birula, 1904: 29; Birula, 1905a: 120; Masi, 1912: 91; Panther, 1912: 110.

**Key of scorpions of Kohgilouyeh
& Boyer Ahmad Province**

1. Pedipalp patella without ventral trichobothria ***Buthidae*** 3
- Pedipalp patella with ventral trichobothria 2
2. Lateral margins of leg tarsi shaped into rounded lobes. ***Scorpio maurus townsendi*** (Pocock, 1900)
- Lateral margins of leg tarsi straight. ***Hemiscorpius lepturus* Peters, 1861**
3. Carapace in lateral view distinctly angled downward from median eyes to anterior margin. Total length less than 50 mm. ***Orthochirus*** 4
- Carapace in lateral view with entire dorsal surface horizontal or nearly so (possibly with a slight anterior decline) 5
4. Dorsal surface of fifth metasomal segment mesially granulated. ***Orthochirus iranus* Kovařík, 2004**
- Dorsal surface of fifth metasomal segment mesially smooth, without granules. ***Orthochirus zagrosensis* Kovařík, 2004**
5. Cheliceral fixed finger with a single ventral denticle ***Razianus zarudnyi* (Birula, 1903)**
- Cheliceral fixed finger with two ventral denticles 6
6. Ventral carinae of second and third metasomal segments and ventral transverse carina of fourth segment armed with very strong denticles. ***Odontobuthus bidentatus* Lourenço & Pézier, 2002**
- Ventral carinae of metasomal segments without very strong denticles..... 7
7. Dentate margin of pedipalp chela movable finger with 4 terminal granules (3 terminal and one basal terminal). ***Androctonus crassicauda* (Olivier, 1807)**
- Dentate margin of pedipalp chela movable finger with 5-7 terminal granules (4-6 terminal and one basal terminal)..... 8
8. Central median and posterior median carinae of carapace joined to form a continuous linear series of granules to posterior margin ***C. matthiesseni* (Birula, 1905)**

- Central median and posterior median carinae of carapace not joined to form a continuous linear series of granules to posterior margin 9
- 9. Trichobothrium *db* on tibia of pedipalp located usually between *est* and *dt*. Trichobothrium *db* may be on level with trichobothrium *est* or rarely between *est* and *esb*. Carinae of carapace not forming a lyre-shaped configuration. Ventrolateral carinae on the fifth metasomal segment with all granules more or less equal in size. ***Hottentotta*** 10
- Trichobothrium *db* on tibia of pedipalp always located between *est* and *esb*. Carinae of carapace forming a lyre-shaped configuration. Ventrolateral carinae on the fifth metasomal segment with irregular granules.....
..... ***Mesobuthus eupeus phillipsii*** (Pocock, 1889)
- 10. Color black except reddish brown chela of pedipalp. Legs may also be reddish-brown. ***Hottentotta zagrosensis*** Kovařík, 1997
- Color not entirely black, usually yellowish green
..... ***Hottentotta saulcyi*** (Simon, 1880)

Acknowledgments

We are grateful to Dr. Taheri, Mrs. Jahanifard, Mr. Masihipour, Mr. Hadiyan, Mr. Hayader, Mr. Habibzadeh, Mr. Bahrani, and Mr. Ghafarnia (Iran) for their kind support.

(Locality No. La-815-2), FKCP. 29–30. *Odontobuthus bidentatus* Lourenço et Pézier, 2002, dorsal and ventral views, ♀ (68 mm), Iran, Bushehr Province, Bushehr to Dayer road, Jeirani village, 27°50'47"N 51°45'33"E (Locality No. Bu-22), FKCP. 31–32. *Compsobuthus matthiesseni* (Birula, 1905), dorsal and ventral views, ♂ (38 mm), Iran, Lorestan Province, 10 km SE Bavineh, 1100 m a.s.l., 33°36'08"N 47°11'59"E, FKCP. 33–34. *Compsobuthus matthiesseni* (Birula, 1905), dorsal and ventral views, ♀ (38 mm), Iran, Lorestan Province, same locality as in Figs. xy-xy, FKCP. 35–36. *Mesobuthus eupeus phillipsii* (Pocock, 1889), dorsal and ventral views, ♂ (52 mm), Iran, Khoozestan Province, near Choga Zanbil (zikkurat) ca. 100 m a.s.l., FKCP. 37–38. *Mesobuthus eupeus phillipsii* (Pocock, 1889), dorsal and ventral views, ♀ (53 mm), Iran, Khoozestan Province, Baghmalek District, Hore Village, 31°55'30"N 49°31'47"E, 185 m a.s.l., FKCP.

Figures 39–50 ➔: 39–40. *Orthochirus iranus* Kovařík, 2004, dorsal and ventral views, ♂ (29 mm), Iran, Bushehr Province, Delvar, 28°42'59"N 51°04'52"E, 4 m a.s.l. (Locality No. Bu-20), FKCP. 41–42. *Orthochirus iranus* Kovařík, 2004, dorsal and ventral views, ♀ (38 mm), Iran, Khoozestan Province, Shadegan district, Toopjeh village, 30°39'33"N 48°36'44"E, 33 m a.s.l., FKCP. 43–44. *Orthochirus zagrosensis* Kovařík, 2004, dorsal and ventral views, ♂ (28 mm) holotype, Iran, Fars Prov., Dasht-E-Arzan, 29°34.644"N 51°56.889"E, 2000 m a.s.l., FKCP. 45–46. *Orthochirus zagrosensis* Kovařík, 2004, dorsal and ventral views, ♀ (46 mm) allotype, Kohgilouyeh & Boyer Ahmad Province, Zagros Mts., Kuh-e-Dinar ridge, Yasuj 10 km N by road, 30°39'N, 51°36'E, 1800–2500 m a.s.l., FKCP. 47–48. *Razianus zarudnyi* (Birula, 1903), dorsal and ventral views, ♂ (22 mm), Iran, Khoozestan Province, near Chogha Zanbil (zikkurat), 32°00'55"N 48°31'04"E, 68.5 m a.s.l. (Locality No. Ch-101), FKCP. 49–50. *Razianus zarudnyi* (Birula, 1903), dorsal and ventral views, ♀ (24 mm), Iran, Khoozestan Province, same locality as in Figs. xy-xy, FKCP.

Figures 51–59 ➔: 51–52. *Scorpio maurus townsendi* (Pocock, 1900), dorsal and ventral views, ♂ (55 mm), Iran, Khoozestan Province, Ahvaz–Omidiyeh road, Chombeh village, 31°11'54"N 49°11'41"E, 44 m a.s.l., FKCP. 53–54. *Scorpio maurus townsendi* (Pocock, 1900), dorsal and ventral views, ♀ (54 mm), Iran, Khoozestan Province, Hayader and Bahrani; Ramhormoz, 31°11'54"N 49°11'41"E, 44 m a.s.l. (Locality No. A-Ra 807), FKCP. 55. *Scorpio maurus townsendi* (Pocock, 1900), dorsal view, juv. (25 mm), Iran, Bushehr Province, Tangestan, Farshanbeh, 28°52'53"N 51°18'43"E, 95 m a.s.l. (Locality No. Bu-35), FKCP. 56–57. *Hemiscorpius lepturus* Peters, 1861, dorsal and ventral views, ♂ (72 mm), Iran, Khoozestan Province, Chogha Zanbil (zikkurat), 32°00'55"N 48°31'04"E, 68.5 m a.s.l. (Locality No. Ch-102), FKCP. 58–59. *Hemiscorpius lepturus* Peters, 1861, dorsal and ventral views, ♀ (58 mm), Iran, Khoozestan Province, same locality as in Figs. xy-xy, FKCP.
